

Which roof surfaces catch the winter sun?

Mean solar irradiation per roof surface, 1-10 January - Bochum, Germany

GIS-Akademie Berlin course exercise (GÜ 08
Solarstrahlung)
Data: course dataset - 1 m DSM, orthophoto, roof
surfaces
Method: Raster Solar Radiation (uniform sky, diffuse
0.4, transmissivity 0.4); mean per roof surface
buffered -1 m
ETRS89 / UTM 32N - Map: Carlo Piccillo, October 2026
